本試題共 1 頁

1. What are the relations between political thoughts, political wisdom and political institutions? What are the differences between classic theory of the separation of three powers and revised theory of the separation of three powers after more than two hundred years of political experimentation in America? Please write these questions with some quite detailed examples? 25%
2. According to Samuel P. Huntington, there exists persistent, radical gap between the promise of the American ideals of liberty, equality, and hostility to authority and the performance of American politics. How do the Americans solve the problem of disharmony in their society? Please write these questions with some quite detailed examples? 25%
2. Can an American President push for his reform or policy with the power granted to him by the Constitution? What is the most important power he needs according to Richard E. Neustadt? Please write these questions with some quite detailed examples? 25%
4. What is four-party politics in the United States of America according to James MacGregor Bundy? What are "crucial election" and "party realignment?" according to V. O. Key? Please answer these questions with some quite detailed examples. 25%
