II.

The American woods have been unnerving people for 300 years. The inestimably priggish and tiresome Henry David Thoreau thought nature was splendid, splendid indeed, so long as he could stroll to town for cakes and barley wine, but when he experienced real wilderness, on a visit to Katahdin in 1846, he was unnerved to the core. This wasn't the tame world of overgrown orchards and sun-dappled paths that passed for wilderness in suburban Concord, Massachusetts, but a forbidding, oppressive, primeval country that was 'grim and wild ... savage and dreary', fit only for 'men nearer of kin to the rocks and wild animals than we'. The experience left him, in the words of one biographer, 'near hysterical'.

- 25. This paragraph is about
 - A) how frightening the American woods are. B) how specious Thoreau's description of the American woods is. C) how wild and savage Americans are. D) how forbidding and oppressive Concord, Massachusetts is.
- 26. According to the author Henry David Thoreau is
 - A) splendid. B) wild C) prudish D) fastidious
