本試題共 1 頁

I. (40 points) Give an historical overview of the place of lexical knowledge in linguistic theory and how this has changed over the years.

II. (40 points) Describe the differences in assumptions and approach between (1) error analysis and (2) the notion of interlanguage. Be sure to compare and/or contrast their views of second language production. Illustrate your points with examples.

III. (20 points) Describe the importance in the field of linguistics of comparing different languages. How is cross-linguistic comparison relevant to linguistic theory?
