准帶項目請打「V」	
<input checked="" type="checkbox"/>	簡單型計算機

13-1

本試題共 / 頁

Please answer the following questions in essay form.

1. If you try to devise an experiment to investigate how people process languages, what experiment would you make up to address the following question? Be as specific as possible about how you would interpret the question and what you would do to try to find an answer through a psycholinguistic experiment. 40%

Does the way you parse a sentence depend on what language you speak?

2. Would it be easier to learn Chinese if your ancestry is Chinese? Do you think that children need to study for years in school to learn to speak their native languages? Please discuss both questions based on linguistic theories. 30%

3. Different components of a grammar are related to each other. Please explicate how various components of grammar could interact with each other. 40%
