Please answer the following questions, and support your claim with valid examples or theoretical assumptions.

1. As we briefly review the history of language teaching methods, we are able to see that the methods have gone through some changes at the beginning of the twentieth century. Please name three of the methods, and describe each method in detail. (50%)
2. Standardized-based assessments have been strongly promoted and criticized in every context. Please compile a brief list of pros and cons of standardized testing as a general educational model. How might one compensate for potential disadvantages? (50%)
