一、翻譯：(10%)

1. Abstracts - An abstract summarizes the contents of a larger work, such as a book or article. An abstract is never subjective, and offers a concise description of the information contained in the work without the interjection of any personal analysis from the abstract author. Abstracts can be used to give a researcher a general idea of the contents of a work itself. If one reads an abstract and decides that the work will be useful, then the actual work itself can be retrieved for use.
