How often do you eat chocolate? If you answered "every day," you may <u>31</u> chocolate. But does eating too much chocolate cause any real health risks? The popular opinion of chocolate is that it is a fattening food that gives you spots, and contains no <u>32</u> qualities. The fact is, chocolate does contain saturated fat. This type of fat can <u>33</u> heart disease by increasing levels of bad cholesterol in the blood. <u>34</u>, scientists at the University of California have discovered that chocolate also contains high levels of chemicals called phenolics, also found in red wine, coffee, and tea. Some phenolics, <u>35</u> in small amounts, are believed to lower the risk of heart disease. In this sense, eating chocolate may be both good and bad to our health.
